STEDMAN CORPORATION “ADAPTS” TO THE RECENT SURGE IN PODCASTING

Stedman Corporation, US manufacturer of premium studio accessories, announces the release of the AD-1 Clamp Adaptor. This adaptor attaches to the clamps of Stedman’s Proscreen XL and PS-101 pop filters to allow them to properly attach to square-tubed broadcast microphone boom arms that are a popular part of many podcast studios, such as the Rode PSA1 or the Heil Sound PL-2T. Stedman’s pop filter clamps were originally designed to work only with circular microphone stands and boom arms. This adaptor will allow the PS-XL and PS-101 to be used with any square boom arm with a width of up to 0.6”.

With a retail price of only \$5.99 USD, this adaptor is a no-brainer for anyone would like to use a Stedman pop filter with this type of microphone boom.

All Stedman products are hand-made in the USA with 100% USA parts. All products are proudly backed by a limited lifetime warranty. For more information, please visit stedmanusa.com or email us at info@stedmancorp.com .
